#### Israel | Desktop app | Blockchain | Gaming

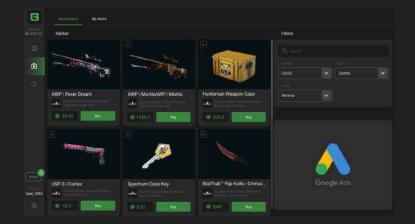

Buff Game - is a virtual gaming economy platform based on blockchain technology, Buff enables gamers to earn coins in the background as they continue to play without interruption. That incentivizes gamers to spend more time gaming, and it opens a new marketing approach for game publishers to interact for longer time periods with gamers to increase loyalty to their brands.

#### Business results:

- → \$1 MLN raised in 2018, \$7 MLN to be raised in 2019;
- → star partners on board: Intel and Overwolf;
- $\rightarrow$  the project is already monetizing.

#### Israel | Desktop app | Blockchain | Gaming

- Integration of Steam API for built-in marketplace purchases;
- League of Legends API for an anti-fraud system for verification of game existence;
- Overwolf API integration for in-game events calculation;
- Al computer vision anti fraud system;
- Accounts authentication through google and discord;
- Admin panel with extra abilities for the admins.
